Summary

passionate, hardworking and self-motivated fresher looking forward to secure a position in a reputable organization to expand my learning, knowledge and skills.

Projects

- **Classification Of Category On BBC News Datasets.**

    In this project we classify the news articles based on cities and providing the entity with the collection of city specific news. The system will be useful for online news categorization and automatic news labeling for news agencies.

- **Diabetics Disease Prediction Using Machine Learning Algorithm.**

    This paper deals with the prediction of diabetic disease by performing an analysis of machine learning algorithms.
